KEY QUALIFICATIONS

- In-depth knowledge of and extensive research and teaching experience in Development Economics, Applied Econometrics, Labor Economics, Education Economics, Health Economics and Human Capital,
- Excellence and extensive experience in data synthesis, statistical analysis, modelling, and quantitative and qualitative research using , SAS, MATLAB, R, STATA, SPSS, L^AT_EX and Microsoft Office Applications.
- A highly self-motivated and well-rounded individual with strong analytical reasoning, leadership, critical and strategic thinking, and detail-oriented skills to independently solve problems and achieve high-quality results. Ability to manage multiple projects in a fast-paced environment under tight deadlines.

EDUCATION

Ph.D., Economics

June 2023

Concordia University, Montreal, QC, Canada

Thesis: *Three Essays on the Economics of Skills, Health and Victimization*

Advisor: Prof. Tatyana Koreshkova

Master of Arts in Development Economics

March 2005

Vietnam - Netherlands Project for Master's Program in Development Economics, an English-language joint program between the Institute of Social Studies, the Hague and National Economics University, Hanoi, Vietnam.

Thesis: *Private and Social Returns to Investments in Education in Vietnam over time 1993 – 2002*

Advisor: Dr. Nguyen Nguyet Nga, the World Bank

B.A., Economics

May 2000

National Economics University, Hanoi, Vietnam

B.A., English language

May 2001

Hanoi University, Hanoi, Vietnam

RESEARCH AREAS

Applied Econometrics, Development Economics, Labor Economics, Education Economics, Human Capital, Health Economics

EXPERIENCE

Department of Economics, Concordia University, Montreal, QC, Canada

Teaching Assistant and Tutorial Leader

2014 - 2022

Tutorial Leader:

2016 - 2020

- Introduction to Macroeconomics

Teaching Assistant:

2014 - 2022

- Undergraduate courses: Economic Data Analysis, Statistical Methods I, Statistical Methods II, Introduction to Macroeconomics, Introduction to Microeconomics, Intermediate Macroeconomic Theory I, Intermediate Macroeconomic Theory II, International Economic Policy and Institutions.
- Graduate courses: Advanced Monetary Theory, International Economics: Trade Theory, Macroeconomics II, Economics of the Environment.

Research Department, National Economics University (NEU), Hanoi, Vietnam

Researcher

September 2005 - August 2014

- Performing research projects and data analyses;
- Developing and managing the Ministerial level research projects, and international co-operative research projects;
- Managing research and consulting activities with local authorities, businesses;
- In charge of scientific information, conferences, workshops, seminars.

Faculty of Planning and Development, National Economics University (NEU), Hanoi, Vietnam

Lecturer

December 2010 - August 2014

- Teaching Development Economics and Socio-economic Development Forecasting courses;
- Developing syllabuses, curricula and teaching materials for Development Economics and Socio-economic Development Forecasting Subjects;
- Participating in research and professional activities at the Department of Development Economics - Faculty of Planning and Development.
- Supervising students.

Developing Entrepreneurship in Vietnam Project, Hanoi, Vietnam

Project Coordinator

June 2009 - August 2014

- Coordinator of Developing Entrepreneurship in Vietnam Project funded by Canadian International Development Agency (CIDA), National Economics University (NEU), Hanoi, Vietnam and Saint Mary's University, Halifax, Nova Scotia, Canada.
- Managing all the assigned project activities in Vietnam;
- Facilitating NEU divisions and Vietnamese partners to fully implement the approved project activities;
- Being responsible for preparing narrative reports and quarterly financial reports from Vietnamese side on time and with sufficient information.

TEACHING CERTIFICATE

University Teaching Professional Certificate

University of Education, Vietnam National University - Hanoi

November 2012 - April 2013

AWARDS

CIREQ (Inter-University Centre for Research in Quantitative Economics) fellowship.	2014 - 2018
Concordia University Full Tuition Recruitment Award, Concordia University, Canada.	2014 - 2017
The International Tuition Fee Remission Award	2014 - 2017
M.A. full scholarship from the Government of the Netherlands (two-year full scholarship).	2002 - 2004

RESEARCH AND PUBLICATIONS

Job Market paper:

Parental Investment and Child Development

Abstract: This paper analyzes the process by which current levels of cognitive skills, noncognitive skills and health depend on past cognitive and noncognitive abilities, past health, parental cognitive and noncognitive abilities and parental investments. I estimate a dynamic production function model with endogenous parental investments to examine dynamic complementarities and interactions among different inputs and factors in forming child human capital. I use a maximum likelihood approach to estimate the joint distribution of latent factors, which are proxied by observable measures and dynamic CES production functions of human capital. The results show strong effects of parental investments on child cognitive skills, noncognitive skills and health and indicate that parental investments are driven by parental skills and resources. The results also indicate evidence that there are dynamic complementarities among the inputs in human capital production, implying that returns to investments are higher for children with better initial conditions. There

is also evidence of high levels of self-productivity and the existence of cross-productivity from noncognitive skills and health to cognitive skills and from cognitive and noncognitive skills to health.

Other Ph.D. papers:

[1] **Transition from School to Work: The Role of Cognitive and Noncognitive Abilities**

Abstract: This paper examines the effects of cognitive and noncognitive skills on college completion decisions and subsequent earnings. I explicitly embed a model of endogenous education decisions and subsequent earnings into a latent factor model. This approach allows for the identification of latent competencies to capture multiple skill dimensions more accurately and correct for measurement errors in observed measures of skills. It also allows for the isolation of the effects of these skills on earnings into components explained by schooling and productivity. Furthermore, this approach solves the endogeneity and reverse causality problems of skills, schooling and earnings by excluding education variables from earnings equations, introducing latent skills and using panel data with skills and outcomes observed at different times. The findings indicate that both cognitive and noncognitive skills in adolescence are associated with college completion and better earnings in early adulthood. Both types of skills are important in directly determining earnings and indirectly determining earnings through their influence on schooling.

[2] **The Consequences of Bullying Victimization on Health and Psychosocial Outcomes in Young Children**

Abstract: This paper uses a structural model combined with an instrumental variable strategy to deal with the endogeneity and measurement error issues of bullying to study the consequences of peer victimization on a range of health and psychosocial indicators. The findings indicate that peer victimization has strong effects on subjective well-being, alcohol consumption and emotional and mental distress of children. These results are consistent with evidence from both developed and developing countries that bullying has substantial consequences on health risks and psychosocial outcomes. I do not find evidence of associations between bullying victimization and self-rated health.
